

ComparatorPlugin

```
classDiagram
    class ComparatorPlugin {
    }
    class CameraView {
        +cameraCallback()
    }
    CameraView --|> ComparatorPlugin
```

The diagram illustrates a class hierarchy. At the top is the 'ComparatorPlugin' class, represented by a rectangle with a thick border and two horizontal lines below the name. Below it is the 'CameraView' class, also a rectangle with a thick border. A vertical line with an open triangle arrowhead points from the 'CameraView' class up to the 'ComparatorPlugin' class, indicating that 'CameraView' inherits from 'ComparatorPlugin'. The 'CameraView' class has a method named '+cameraCallback()' listed in its bottom section.

CameraView

+cameraCallback()
